NIIT UNIVERSITY ANNOUNCES THE NU-MBA PROGRAM

- *Mentorship Program to Provide Personalised Guidance from Eminent Corporate Leaders*
- *International Immersion Program to shape understanding of emerging economies*
- *Strong Industry Connect to ensure first-day-first-hour productivity after MBA*

The not-for-profit NIIT University unveiled its MBA program – the NU-MBA – on April 16, 2010 and commenced admissions for the 2010 batch. This new-age MBA program seeks to create industry-linked, future-ready, better-connected and complete Management graduates, and is packed with several innovative features.

A unique initiative by which every MBA student is assigned a mentor from industry who guides him throughout the program, has brought together 15 CEOs from some of the most reputed companies in the country. Names like Manoj Kohli (Airtel), Raghupati Singhanian (JK Industries), and Bhaskar Pramanik (Oracle India) are a few who have agreed to mentor the NU-MBA students through structured personalised interactions. The Mentorship Program is supplemented by other distinctive industry-linked elements, so that students are immediately productive at their post-MBA jobs.

The NU-MBA also offers students a structured exposure to an emerging economy like China or an African country, with the idea that these economies will dominate the world when the graduates are in leadership positions. A 4-week Immersion Program in the country includes participation in ongoing classes at a reputed B-School, followed by a supervised study of local industry.

Speaking about the NIIT University MBA program Mr. Rajendra S Pawar, Chairman, NIIT Ltd. and Founder, NIIT University, said, "We are delighted that the distinctive features of the NU-MBA program have been warmly received by industry, and that a group of seven reputed companies have already committed placement to all students of the first batch." These companies comprise Biocon, Ernst & Young, Fortis, ICICI Bank, Jubilant Organosys, and of course NIIT Technologies and NIIT, Mr. Pawar added.

The NU-MBA program is a 2-year fully residential program offered at the University's sprawling campus at Neemrana in the NCR. The program consists of a rich set of 36 courses delivered over 6 terms, and requires a specialisation in one Concentration Area out of the 6 areas offered: Strategy & Leadership, Marketing, Finance, Operations Management, Human Resources and Information Systems. In addition to Summer Internship, which is supervised on-the-job by NU faculty, students additionally take up 3 real-world projects.

Dr. Rajeev Shorey, President, NIIT University, said, "The NU-MBA is one of the few MBA programs that resides within a multi-disciplinary University and a thriving 24x7 campus. This gives the MBA students several advantages, from selecting a few electives from among emerging technology areas to participation in cross-disciplinary projects, and makes them holistic and seamless."

Another special feature of the NU-MBA program is its emphasis on **Management Perspectives** that shape the attitudes of NU-MBA students. Special courses deal with issues like Ethics, Human Values, Inclusive Growth, Environment and Innovation, and an individual Social Connect project deals with a Management problem sourced from an NGO. Equally, there is an emphasis on Professional Life Skills, with a set of courses dealing with communication, personality, personal quality and individual productivity.

NIIT University offers programs from Bachelors to Doctoral levels in areas of emerging Engineering technology and Management. Founded on the core principles of industry-linked, research-driven, technology-based and seamless education, the University admitted its first batch of students in 2009. Its 100-acre campus is being developed using fully-green and sustainable principles.

Admissions for the MBA program have commenced. Graduates from any discipline with a minimum of 50% marks, or final-students awaiting results, are eligible to apply. The Selection Process seeks to identify meritorious men and women with effective personalities who possess a spirit of inquiry, excitement and daring. Candidates can obtain Application Forms from the website www.niituniversity.in/mba or from the NU Admission Office in Delhi. Completed Application Forms will be accepted until May 15, 2010.

Candidates have to appear for the NUMAT – NIIT University Management Aptitude Test – as a part of the Selection process. Candidates with valid CAT/MAT/ATMA/XAT or GMAT scores are exempted from appearing for the NUMAT. Other elements of the selection process, where industry representatives participate, include a communication proficiency test, a presentation and a personal interview. In the interests of fair selection of candidates with diversity, all eligible students undergo the entire selection process, without elimination based on intermediate cut-offs.

'We will offer what a knowledge society needs'

NIIT University recently launched its MBA programme called NU-MBA and commenced admissions for its first batch. The programme, which NIIT touts as the 'new age MBA', aims to groom the new age CEO for 2020 by imparting holistic training in a broadbased intellectual environment, according to RAJENDRA PAWAR, founder of NIIT University. **Kirtika Suneja** caught up with him to know more about the programme and progress of the university that was launched in September last year. Edited excerpts:

Q&A

RAJENDRA PAWAR

Founder, NIIT

How much investment will go towards setting up of the university?

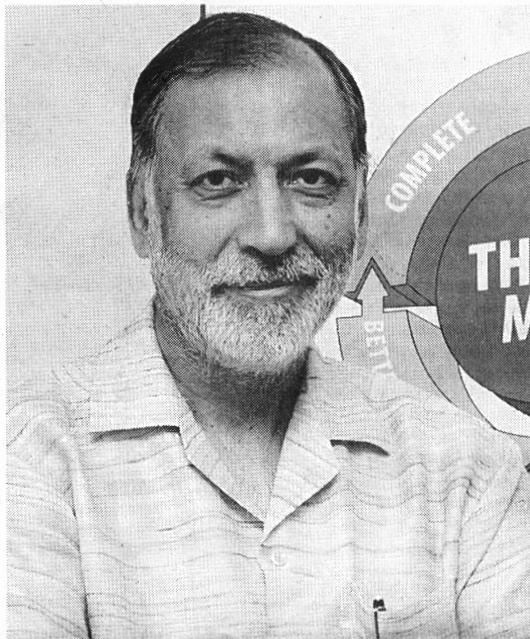

We want NIIT University to be a self-financing one and that can be done through fees and research output. We will spend around Rs 1,000 crore in these 10 years to build the varsity. Of this, almost Rs 100 crore has been spent to build 10 per cent of the capacity. The founders have put in some initial token amount and raised loans simultaneously.

What's so different about what you call the new age MBA?

This programme will teach all streams like strategy, marketing, HR among others but what makes it unique is that besides the intellectual individual, we will impart holistic training in an intellectual environment who will be ready for professional life. The differentiating factor is our CEO mentorship programme. It is built on the premise that experiential inputs, macro-level insights and networking opportunities are all immensely necessary for an MBA student. As part of this, a group of four students will be assigned a mentor from the industry throughout the programme who will talk to them about the industry in particular and other things in general. These mentors are from different walks of life like Pramod Bhasin, Raghupati Singhania, Manoj Kohli, among others.

But what about full-time faculty members?

We have a four-layer concept of faculty- founding professors, mentor professors, area leaders and young PhDs. So, mentor professors are people in their 60s who are passionate about their subject and are able instill that passion in the students also. This will be full time faculty and they will nurture

the young PhDs (faculty). The founding professors will not be on campus full time but will visit often. Then, there will be regular professors or area leaders. Overall, we plan to have about 600 faculty members for 5,000 students over the next 10 years with a faculty-student ratio of about 1:12.

You say the university and its programmes will be different from existing ones...

Yes. This is so because our university and its programmes are based on the four core principles of industry linked employability, technology based, research driven and seamlessness. So, for us the entire campus is a laboratory and we want to be the first of the post-industrial universities. This means that we will offer what a knowledge society of today needs and not what the industrial society of the previous era wanted.

How many students are studying at the university?

We have 39 students in the founding batch-29 in B.Tech and 10 in M.Tech. We plan

to add 500 students every year so as to have the complete campus up and running in 10 years with a capacity of 5,000 residential students and another 1,500 day scholars. As of now, a hostel for 450 students is ready besides we have a classroom capacity for 1,600 students. One batch of B.Tech, M.Tech and computer science is already under way and there are 60 students in every class. The two-year MBA programme will be launched this year.

Are there other programmes in the pipeline?

As of now, we have computer science and management, but going ahead we plan to launch bioinformatics and educational technology like design, languages and creative arts. There are a few more masters' programmes in the offing but we want to strengthen the liberal arts area by focusing on behavioural sciences, sociology, philosophy, psychology and traditional knowledge. We will follow the 4-2-1 year approach that is four years for graduation, two for post-graduation and one year doctoral programmes.

New age demands of leadership

NIIT UNIVERSITY IS LAUNCHING ITS MBA PROGRAMME IN AUGUST. RAJEEV SHOREY, PRESIDENT OF THE UNIVERSITY, SHARES THE SPECIAL FEATURES OF THE CURRICULUM WITH TIRNA RAY

Rajeev Shorey

When will the classes for the new MBA programme begin?

Classes will begin on August 9, but admissions are already on and students can apply. We follow a rolling admissions policy and the first set of offers would be made on May 14. The earliest closing date for completed applications is May 15, following which applications would be accepted only if vacancies exist. We expect to close admissions by June 30.

What are the specialisations on offer?

Students will have to opt for one concentration area out of six areas initially on offer, namely, strategy and leadership, marketing, finance, operations management, human resources and information systems. This means that the elective courses will be oriented towards the concentration area that they have chosen.

How do you plan to fulfil the new age demands of leadership through the programme?

Our focus is to make our MBA graduates industry-linked, future-ready and better-connected. It is the industry — where these new-age leadership needs are felt — that must participate in identifying the real issues and then we can work together to fulfil them.

As part of our mentorship programme, every MBA student will be assigned a mentor from industry. CEOs of some of the reputed companies in the country (TATA Communications Ltd, Bharti Airtel Ltd etc) have agreed to be mentors. In addition, students will be assigned an industry coach — a senior corporate leader who is readily accessible. Besides, we have gone into collaboration with corporates to ensure placement

assistance for the passing out batch, before students start their session.

What are the special features of the curriculum?

In order to address new-age leadership demands, it is necessary to have a view of the future. For example, we believe that emerging economies like China and the African countries will become even more significant when our students are working as managers. Accordingly, we have devised a four-week International Immersion Programme in China or Africa, where students will get an opportunity to participate in MBA classes and also undertake a study of the local industry.

Also, we believe that human perspectives will become crucial for future managers. So we have a special set of courses that deal with issues like ethics, human values, sustainability and so on, where students work on a 'Social Connect' project on a management problem sourced from an NGO.

Q&A

What are the eligibility criteria and cost of the programme?

Graduates from any discipline with a minimum of 50% marks, or final-students awaiting results, are eligible to apply. Admission forms can be downloaded from the website (www.niituniversity.in/mba). The selection process seeks to identify meritorious candidates with effective personalities and spirit of enquiry, among other things. We have decided to allow all eligible applicants to undergo the full selection process, without any intermediate elimination based on arbitrary cut-offs. The fee for the two-year programme is around Rs 8 lakh (exclusive of hostel and living expenses). It may be of interest to students that NIIT University has a tie-up with Indian Overseas Bank to facilitate educational loans.

NIIT ropes in industry leaders, CEOs to mentor MBA students

PTI
NEW DELHI

NIIT University has roped in leading industry leaders and CEOs, including Manoj Kohli of Bharti Airtel, to mentor its MBA students. NIIT University—the not-for-profit institution of IT education provider NIIT Ltd—will start offering an unique MBA programme from August this year, under which industry stalwarts will mentor students.

Already 15 CEOs, including Manoj Kohli

of Airtel, Raghupati Singhania of JK Industries and Bhaskar Pramanik of Oracle India have agreed to mentor the NIIT-MBA students. "The mentorship programme is a unique feature. As per the programme, a group of two-three students would be assigned to a mentor. The students can interact with their mentor during the course of their programme," Rajendra S Pawar, chairman, NIIT and founder, NIIT University, said.

Besides, this NIIT University (NU) has also roped in mid-level managers to coach the students. "To make this programme in-

dustry-linked, we will also have mid-level managers from the industry whom the students can contact anytime for any kind of help," Mr Pawar added. NU MBA, as the course is described, will be a two-year fully residential, industry-linked program that will be offered at the University's campus at Neemrana in the NCR. Even before the course commenced, a group of seven reputed companies, including Biocon, Ernst & Young, Fortis, ICICI Bank, Jubilant Organosys, NIIT Technologies and NIIT Ltd, have already committed placement to all

students of the first batch, Mr Pawar added. With the growing needs of the industry for world class managers, the institutes offering MBAs have gone up in the last few years. There are over thousand recognised institutes offering MBA in India, including Indian Institute of Management, IIMs.

However, this kind of mentoring programme is a first of its kind, NIIT University president Rajeev Shorey said. The MBA program consists of 36 courses delivered over six terms, and requires a specialisation in one of the six areas offered—Strategy &

Leadership, Marketing, Finance, Operations Management, Human Resources and Information Systems.

Besides, the NU-MBA also offers students a structured exposure to an emerging economy like China or an African country as a part of its four-week Immersion Program. Admissions for the MBA program have commenced. At present, NU offers programs from Bachelors to Doctoral levels in areas of emerging Engineering technology and Management. The University admitted its first batch of students in 2009.

About NIIT University

Nestled in the foothills of Aravali, in Neemrana, Rajasthan, the picturesque 100-acre fully residential Green campus of NIIT University is equipped with state-of-the-art technology-enabled teaching methodology backed by a strong research-focused curriculum for facilitating a continuous process of learning and development.

The emblem of NIIT University depicts a Mobius ring, symbolising eternity. The sides of the Mobius ring merge in and out, back and forth to create the most graceful, seamless and complete structure imaginable to the human mind. Similarly, the knowledge that NIIT University imparts is the foundation for multi-faceted careers, endless in their potential.

Set up in 2009, with the vision of being the leading centre of innovation and learning in emerging areas of the Knowledge Society, the University is dedicated towards building great careers and ensuring exceptional job opportunities to all its students. It has been developed as an institute of excellence based on the four founding principles of providing industry linked, technology based, research driven, seamless education.

NIIT University offers BTech Programs in Computer Science & Engineering, Information & Communication Technology and Biotechnology; MTech Programs in Pervasive Systems, Embedded Systems, Bioinformatics and Educational Technology. PhD programs in Computer Science & Engineering, Information & Communication Technology, Educational Technology and Bioinformatics/Biotechnology are available to students. The University's MBA Programs have just been announced.

The MBA Program at NIIT University (NU MBA) is designed to help aspiring professionals build meaningful connections to the real world of business and become successful leaders of the future. Through the Mentorship Program, each MBA student will be mentored by an eminent corporate leader and coached by an industry professional. NU MBA trains these future CEOs for the challenges and opportunities of emerging economies like China or an African country through its International Immersion program. A number of reputed companies have already committed placements for all students of the founding batch 2012, subject to satisfactory graduation with consistent good conduct.

In the years to come, many new courses and academic areas will be established with an aim to help students build great careers across a wide range of emerging areas spanning the breadth of the knowledge society.

Vibrant social and recreational activities form the heart of campus life at NIIT University. A host of activities are interspersed along the shaded walking spine, including volleyball, golf/putting, basketball, gym and tennis. Furnished student hostels ensure comfortable temperatures year round with an energy-efficient geo-thermal comfort cooling system which leaves minimal carbon footprint. Each room is positioned to offer a direct window view of the nearby Aravali Hills. The fully-residential NIIT University campus offers the clean air and safety of a small town, while being located remarkably close to major metros.

The NIIT University, a not-for-profit institution, has received recognition vide Government of Rajasthan Ordinance No. 4 of 2009 dated 14th October 2009.
