# SOP of the process followed for collection, verification, and sharing of the data

Collection: Any documents related to students are confidential to the University. CIIE collects Startup idea details in a specific format as part of incubation process.

Verification: Submitted data is verified by going through website of startup. In case the startup is registered outside NU then we collect the CIN number and check for company details on Ministry of Corporate Affairs, Government of India.

Sharing: After getting consent from startup founders, basic information about their startup is published on NIIT University's website and also gets shared with AIs & VCs for securing funding for their startups.

Startup info from the founder in specific format mentioned in the incubation policy
